PRESS RELEASE

CONSTRUCTION OF THE GROUP'S CDR PLANT COMPLETED, PLANT COMMISSIONED TWO MONTHS AHEAD OF SCHEDULE

**Methanol capacity to increase by 46,000 MT PA • group reviewing new
petrochemical opportunity**

DOHA, QATAR - Industries Qatar ("IQ" or "the group"; QE: IQCD), one of the region's industrial giants with interests in the production of a wide range of petrochemical, fertiliser and steel products, issued a brief statement regarding the status of the group's petrochemical projects.

Construction has been completed at the QR 145.5 million CO₂ recovery plant of the group's fuel additive joint venture, Qafac. This plant is the largest of its kind for methanol production in the world, and is designed to capture over 500 MT per day of carbon dioxide and utilise it in the production of methanol. The plant is expected to not only reduce Qafac's greenhouse gas emissions, but simultaneously boost the group's production of methanol by circa 46,000 MT PA.

The group also confirmed that the Al Sejeel Petrochemical Complex project has been put on hold, and that a new downstream petrochemical project that is expected to yield better economic returns is instead under study. Further details will be provided in due course.
